Let's use tech in logistics for climate mitigation for a successful startup to secure the EXIST grant together - join our team now! From ideation to a company

Are you a software App developer or software engineering student or graduate who is passionate about making a positive impact on the world? Do you want to be part of a technology-driven startup that is focused on innovation and sustainability? Look no further! We are applying for the EXIST grant and are on a mission to combat climate change via technology in the logistics sector. Join us and be part of a team that is dedicated to making a difference. Let's bring this idea to life together!

Responsibilities:

- Design, develop, and maintain high-quality mobile and web applications
- Write clean, efficient, and well-documented code
- Participate in the entire software development lifecycle, from ideation to release
- Collaborate with cross-functional teams to identify user requirements and develop innovative solutions
- Troubleshoot and debug code as needed
- Keep up to date with emerging trends and technologies in app development

Qualifications:

- Enrolled or holding a Bachelor's or Master's degree in Computer Science or a related field
- 1+ years of experience in mobile and web app development
- Proficiency in programming languages such as Java, and JavaScript
- Experience with mobile app development frameworks, such as React Native or Flutter
- Familiarity with web development frameworks, such as AngularJS or ReactJS
- Strong problem-solving skills and attention to detail
- Passion for sustainability and social impact
- Self-motivated and results-driven
- Able to communicate in English
- German is a plus
